SUMMARY

Full-stack developer with production-deployed applications spanning payment integration, real-time systems, and AI/LLM pipelines. Authored 15,000+ lines of production code across web and mobile platforms using Next.js, FastAPI, and Supabase. Built and shipped a live food-ordering platform with Razorpay payment security (HMAC webhook verification) and an offline AI resume analyzer with a custom 392-line semantic matching engine. Seeking a software engineering internship to contribute to scalable product development.

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python, HTML5, CSS3
Frontend	React, Next.js 14, Tailwind CSS, Three.js, Responsive Design
Backend	Node.js, FastAPI, REST APIs, Webhooks, Server-Side Rendering
Databases	Supabase (PostgreSQL), Prisma ORM, Row-Level Security, Real-time Subscriptions
Auth & Security	Supabase Auth, NextAuth.js, OAuth 2.0 (Google, GitHub), JWT, HMAC Verification
AI / LLM	Ollama (Phi), NVIDIA API (DeepSeek R1), Prompt Engineering, Structured JSON Extraction
DevOps & Tools	Git, GitHub, Vercel, VS Code, Postman, Razorpay SDK, Resend (Email API)

PROJECTS

Apnaa Khana — Full-Stack Food Ordering Platform

Live · [GitHub](#)

Next.js 14 · TypeScript · Tailwind CSS · Supabase · Razorpay · Resend · React Native (Expo) · Vercel

- Engineered a production-deployed food ordering platform (~10,000 LOC across 87 source files) with a complete 6-stage order lifecycle: menu browsing → cart → checkout → payment → real-time tracking → review
- Implemented server-side price recalculation and **crypto.timingSafeEqual()** HMAC webhook verification to prevent payment manipulation attacks on Razorpay integration
- Built real-time order tracking using Supabase WebSocket subscriptions with an admin dashboard for live order management and status updates
- Developed 3 transactional email flows (order confirmation, status updates, review prompts) using Resend API with templated HTML
- Ported the entire web application to a cross-platform React Native (Expo) mobile app with 4-tab navigation, SecureStore auth persistence, and GPS-based auto-location checkout
- Designed the database schema with 5 tables, 8 SQL migrations, Row-Level Security policies, and role-based admin access control

AI Resume Analyzer — Offline ATS Scoring & Rewriting Tool

[GitHub](#)

Next.js · TypeScript · Prisma · PostgreSQL · NextAuth v4 · Ollama (Phi LLM) · Tailwind CSS

- Built a 392-line semantic matching engine with 3-tier keyword analysis (exact → synonym → related concepts), covering 103 keyword relationships across 30 synonym entries and 15 critical-skill blockers
- Implemented weighted ATS scoring algorithm (70/30 keyword-to-content split) with domain-specific skill detection across 4 industries (tech, finance, medical, generic) and 48 categorized skills
- Integrated 5 parallel Ollama LLM inference functions with hardened rule-based fallbacks, enabling complete offline analysis at zero API cost
- Designed a full analysis pipeline: PDF parsing → domain detection → keyword extraction → semantic scoring → AI-generated feedback → side-by-side resume comparison → automated rewrite
- Implemented Google and GitHub OAuth via NextAuth v4 with middleware-based route protection and PostgreSQL session persistence through Prisma ORM

ContractLens — AI-Powered Contract Risk Analysis SaaS

[GitHub](#) · In Development

- Architected a SaaS platform enabling freelancers to upload contracts and receive automated AI-driven clause-by-clause risk analysis with structured JSON output
- Built a FastAPI backend pipeline: document upload → PDF/DOCX parsing (PyMuPDF) → DeepSeek R1 analysis via NVIDIA API → structured risk scoring → Supabase persistence
- Developed an interactive two-panel clause analysis UI with real-time risk filtering, severity indicators, and copy-to-clipboard functionality

VIRTUAL EXPERIENCE PROGRAMS

Walmart Global Tech — Advanced Software Engineering

Mar 2026

Forage Virtual Experience · Advanced Data Structures, Software Architecture, Relational Database Design, Data Munging

Deloitte — Technology, Cyber Security & Data Analytics

Mar 2026

Forage Virtual Experience · 3 Simulations — Coding & Development, Cyber Security, Data Analysis & Forensic Technology

EDUCATION

Bachelor of Technology — Computer Science & Engineering

2025 – 2029

KCC Institute of Technology and Management, APJ Abdul Kalam Technical University (AKTU)

CGPA: 7.14 / 10.0 | Class Representative

CERTIFICATIONS

- ▶ **Advanced Software Engineering Job Simulation** — Walmart Global Tech (Forage)
- ▶ **Technology Job Simulation** — Deloitte (Forage)
- ▶ **Cyber Security Job Simulation** — Deloitte (Forage)
- ▶ **Data Analytics Job Simulation** — Deloitte (Forage)
- ▶ **Git Version Control** — HCL GUVI (Google for Education Partner)
